"It's a Cinch"

VALUE OF SAVINGS
BECOMES APPARENTOne of Great Lessons of War is That
of National and Individual Thrift,
Now Rapidly Growing

Now that the new German government has accepted the inevitable, and has officially signed the peace terms dictated by the allies and the countries associated with them, the greatest and most disastrous war that ever scourged the world is ended.

For nearly five years the world has been topsy-turvy. The things that were needed yesterday are no longer required, and the activities of the great war establishments and munition plants are being diverted to the manufacture of implements of peace.

There must now be a readjustment. Governments that have thought in billions and spent money with a lavish hand, must retrench and think in millions and even smaller amounts, and must gain a new perspective.

Viewed in the retrospect the part played by America in the great world war is one of the most glorious chapters in history. And in the making of this brilliant history the plain American citizen played a stellar role. The mountains of munitions, the equipment for the millions of soldiers, the great ships that carried the men across the ocean, could not have been provided had not the common people of America provided the money.

Much of this money was obtained through the sale of Liberty Bonds and War Savings and Thrift Stamps. This great volume of money has not been wasted. First it brought permanent peace to the world, and now that real peace is here, every cent that was so invested will come back to those who aided their government, and it will come back with interest.

This war that is now happily ended has taught the people the value of saving. They went into the saving game as much through patriotism as anything else. But now that they are reaping the returns, and see that what they did with a patriotic motive is a real foundation for future fortune, they have gained a new confidence in their country, and they will continue to buy the securities the Treasury Department offers, and will make the country many-fold more prosperous than it would have been had not the war instilled the lesson that will prove invaluable in future years.

PAYING OFF THAT
MORTGAGE

Theodore Roosevelt said: "Thrift is merely the use of hard common sense in the spending of money." Paying off the mortgage on the installment plan by buying War Savings Stamps is one of the uses of this hard common sense.

Not only does this plan offer a practical way of saving small amounts of money, but small amounts may be earning interest as soon as they are set aside toward the collecting of the larger sum. This interest in turn materially helps to reduce the 6 per cent interest rate commonly charged on mortgages.

When the mortgage comes due it may either be paid off in whole, or in part and renewed, the method of saving through War Savings Stamps being employed until the principal is liquidated.

"May the vast future not have to lament that you neglected it." Buy Thrift Stamps and War Savings Stamps.

Is the glue on the back of War Savings Stamps flavored with peppermint or wintergreen? Buy one and find out.

CANNOT LOSE MONEY
IF INVESTED WISELYFunds Put Into War Savings Stamps
Are Absolutely Safe and Yield
Handsome Profit to Holder

Government securities afford the safest and most practical investment in the world. A War Savings Stamp is a promissory note for \$5 if redeemed at maturity, or for the original cost of the stamp plus accrued interest if redeemed before maturity.

It was only after America entered the great world conflict that the small wage earner in this country was afforded the opportunity of investing in government securities; of becoming co-partners with the government. That there are today more than 20,000,000 holders of government securities is a fact which speaks for itself.

When you buy a War Savings Stamp you are helping the government. To be able to make a loan to the government, even as small as the sum represented by a War Savings Stamp, is a proof of patriotism and also a practical manifestation of that spirit of national thrift and individual savings which has come to us as a permanent heritage from the war.

WEALTH OF NATION
GROWING RAPIDLY

In Washington some of these experts, who are masters of figures and who have a mind attuned to statistics, frequently dig up queer things. One of this type has figured out that the total wealth of the United States is \$300,000,000,000. Then he figures out the new wealth produced annually, which he terms "net income." This gets into dizzy figures, too. He estimates that last year the national wealth increased \$18,000,000,000, which he admits is going faster than the normal. Another Washington official points out that one of the best ways to conserve this national income in wealth is for individuals to buy War Savings Stamps.

ONE SAFE PLACE FOR LIB-
ERTY BONDS—THE BANK—
PUT YOURS THERE

The Cumberland (Md.) Evening Times prints the following, which should be a reminder to all who are now keeping their Liberty Bonds or War Savings Stamps in boxes around the house or in broken tea pots or in mattresses:

Mrs. William B. Dever, wife of Fireman-Engineer Dever, Baltimore and Ohio railroad, of Rowlesburg, W. Va., threw \$1,650 worth of Liberty Bonds into the Cheat river, back of her home, by mistake, with rubbish she had cleaned from their home. The valuable bonds have not been recovered although a diligent search of the Cheat river bottom in that vicinity has been made.

W. B. Dever's great loss of bonds has a parallel. W. W. Wood, Baltimore and Ohio railroad engineer, lost \$150 worth of Liberty Bonds from his pocket. They were a \$100 and \$50 issue. Engineer Wood intended to deposit the bonds in a local bank. They have not been located.

A laborer unloading a car of coal at Paw Paw, Saturday, found a \$100 bond in the coal. It is thought to have dropped from the pocket of a car loader at the mines. The laborer reported the matter to the company's station agent at Paw Paw. It is said, with a view of returning it to its owner.

COLE BLEASE ANNOUNCES

Will Be a Candidate for Congress in
General Election.

Columbia, S. C., July 28.—Former Governor Cole L. Blease today announced that he would be candidate for Congress at the general election, but that he would not be a candidate

in the primary. Blease is preparing the platform on which he will enter the race and will announce it in a few days.

Haig says England won the war. But he doesn't say who lost it up till 1918 and who are were fighting with their backs to the wall.

Delicate Mechanism

Despite its scope Swift & Company is a business of infinite details, requiring infinite attention.

Experienced men must know livestock buying with a knowledge of weight, price, the amount and quality of meat the live animals will yield.

Each manufacturing operation must be done with expert skill and scientific precision. A highly perishable product must be handled with speed and care to avoid loss.

Chemists, engineers, accountants, and other specialists are required to take care of our intricate problems.

Alert wisdom and judgment must be used in getting stocks of goods into the open channels of demand through our four hundred branch houses. Branch house organizations must show activity and energy to sell at the market in the face of acute competition from other large packers, and hundreds of small ones.

All these requirements of intelligence, loyalty, devotion to the task, are met in the personnel of Swift & Company. Yet the profit is only a fraction of a cent per pound with costs at minimum.

How can the workings of this delicate human mechanism be improved upon?

Do you believe that Government direction would add to our efficiency or improve the service rendered the producer and consumer?

Let us send you a Swift "Dollar".
It will interest you.
